This title is one of six releases from the LexisNexis Graduate Tax Series. United States International Taxation embodies the dual goals established for the LexisNexis Graduate Tax Series: to provide graduate tax students with a solid foundation in the applicable rules and to enhance their skills in reading and applying complex statutes and regulations. To this end, the text relies very little on the oftentimes laborious analysis of cases and other sources that are secondary to the Code and the regulations. Instead, each chapter provides an overview of the substantive content, with emphasis on important issues that are not apparent from the language of the Code and regulations. This book contains teaching materials for law school courses in the United States federal income taxation of persons engaged in cross- border activities and transactions. It contains 21 separate Units that address fundamental concepts of residency and source, the taxation of United States persons (citizens, residents, and domestic corporations) on their activities within the United States, and the safeguard rules in place to curtail potentially abusive tax avoidance in the

The book also provides a guided, hands-on approach that gives students an opportunity to go outside of the text and gather information about how certain aspects of education law work in "the real world" and in their own states. This innovative text starts with an introductory and foundational chapter and then proceeds to cover each topic through a problem-based approach. The text provides a problem and related statutory, regulatory, and court decisions that not only inform students of the relevant law but also provide impetus for students to focus their understanding on real and relevant problems. For example, the opening foundational chapter (which includes *Brown*, *San Antonio*, and *Plyler*, as well as information on the state of education and education reform), asks students to consider a law / litigation-oriented strategy for achieving improvement in the education system as we know it today. Similarly, part of a later chapter on liability offers extensive narrative and then poses a problem on a space-monkey playground game (kids hang upside down on the monkey bars and deliberately try to pass out as if floating in space). To facilitate students' ability to understand and answer the problem, the text offers cases that are decided both ways on analogous facts and negligence. The problems in *Education Law: A Problem-Based Approach* are all drawn to be current and immediately relevant. The case and statutory and regulatory materials support this approach by including the classic Supreme Court cases such as *Brown v. Board of Education*, *Rowley*, *T.L.O.*, and the speech trilogy, along with the recent decisions by the Court such as *Safford Unified Sch. Dist. v. Redding*, *Forest Grove Sch. Dist. v. T.A.*, and *Horne v. Flores*. Leading lower court cases are also provided along with various state and federal statutes and regulations. With the Earth's changing chemistry as the focus, this text pulls together the many disparate fields that are encompassed by the broad reach of biogeochemistry. With extensive cross-referencing of chapters, figures, and tables, and an interdisciplinary coverage of the topic at hand, this text will provide an excellent framework for courses examining global change and environmental chemistry, and will also be a useful self-study guide.
